

Rica Dioquino-Munoz

Software Engineer

✉ rica.dioquino@yahoo.com | ☎ 09176510228 | 📍 Sta Rita Guiguinto Bulacan

PROFESSIONAL SUMMARY

✓ Software Engineer with over 10 years of experience in developing C#/.NET web and desktop applications, complemented by 4 years of mobile development expertise.

✓ Has a strong background in full-stack development, with proficiency in Angular, .NET Core, and RESTful API design, as well as iOS development using Objective-C and Swift.

✓ Has technical expertise extends to cloud and DevOps practices, including Azure, CI/CD pipelines.

✓ Has delivered solutions across multiple industries—including airline, financial services, logistics, and healthcare—demonstrating adaptability in both backend and mobile development roles

✓ Experienced in Agile methodologies, collaborates effectively with cross-functional teams, and contributes to system design, feature implementation development, documentation, testing and production support.

✓ Recognized as a results-oriented and detail-driven professional, committed to continuous learning, maintaining high-quality standards, and delivering scalable, reliable software solutions.

SKILLS

Programming Language: C#, Objective-C, Swift

Version Control: TFS, GIT, GITHUB

Development Tools: Visual Studio, Visual Code, XCODE

Database: Sql, CosmosDB, MongoDB, Redis

Data File Format: JSON, XML

Scripting Languages: Javascript

Frontend Frameworks: Angular, React

Styling Language: CSS, Saas, Less

Backend: WCF, REST API

Application Template: MVC, Windows form, ASP .NET, SwiftUI

Others: OOP, SOLID and Design Pattern, Ntier Layer
Architecture, Scrum, Agile, CI/CD, Azure DevOps, Terraform,
GitHub Copilot, Spec Driven Design, Prompt Engineering

ROLES AND RESPONSIBILITY

- ✓ Develop and implemented executable code solutions based on the software specifications
- ✓ Analyze business requirements and ensure that the user interface design will conform to the usability standards that will be set with the client
- ✓ Conduct code reviews and unit testing
- ✓ Provide research and development work as required in the project
- ✓ Integrate code modules and ensure that the system components adhere to the overall system requirements and performance
- ✓ Collaborate with the team members (tester, co-developer, project manager and product owner) to provide plan and execution for the project
- ✓ Communicate with the client (if needed) for daily or weekly task/project updates.
- ✓ Practice Daily SCRUM for project development and tasks updates.

PROFESSIONAL EXPERIENCE

➤ **Logistic Industry** – *Frontend/Backend Developer*

April 2020 – October 2020

- ✓ Implement Data Layered Software architecture
- ✓ Implement AngularJs as frontend SPA framework
- ✓ Implement REST api using Asp.net Core
- ✓ Implement code first Entity Framework
- ✓ Implement Command Query Responsible Segregation
- ✓ Conducted maintenance and Bug fixing
- ✓ Active participate on sprint planning and retrospective
- ✓ Act as mentor to junior developer
- ✓ Coordinate and direct communicate with Project Manager, Team lead, Tester and Client

Technology: Web Api, Sql, Microsoft .net C#, Angular 9.0, Git, Asp.net Core, Dapper, CQRS, Entity Framework, Visual Studio, Visual Code

➤ **Insurance Industry** – *Frontend/Backend Developer*

November 2019 – March 2020

- ✓ Implement Data Layered Software architecture
- ✓ Implement AngularJs as frontend SPA framework
- ✓ Implement REST api using Asp.net Core
- ✓ Implement code first Entity Framework
- ✓ Conducted maintenance and Bug fixing
- ✓ Active participate on sprint planning and retrospective
- ✓ Act as mentor to junior developer
- ✓ Coordinate and direct communicate with Project Manager, Team lead, Tester and Client

Technology: Web Api, Sql, Microsoft .net C#, Angular 7.0, Git, Asp.net Core, Dapper, CQRS, Entity Framework, Visual Studio, Visual Code, Jira

PROFESSIONAL EXPERIENCE

➤ **Financial Industry** – *Mobile/Frontend/Backend Developer* May 2019 – October 2019

- ✓ Implement Data Layered Software architecture
- ✓ Implement MVC framework pattern
- ✓ Conducted maintenance and Bug fixing
- ✓ Coordinate and direct communicate with Project Manager, Team lead, Tester and Client

Technology: Web Api, Sql, Microsoft .net C#, Angular 7.0, Git, Asp.net Core, Dapper, CQRS, Entity Framework, Visual Studio, Visual Code, Jira

➤ **Logistic Industry** – *Frontend/Backend Developer* May 2016 – March 2019

- ✓ Conducted maintenance and Bug Fixing
- ✓ Develop feature as per requested by client.
- ✓ Actively participate on sprint planning, retrospective
- ✓ Coordinate and direct communicate with Team Lead, Tester and Client

Technology: Microsoft .NET (C#), HTML5, CSS3, MS SQL Server 2012, .Net, JQuery, JSON, MVC(Model-View-Controller), MSMQ, WCF, WPF

➤ **Health Industry** – *Frontend/ Backend Developer* October 2015 – March 2016

- ✓ Implemented Data Layered Software Architecture
- ✓ Implemented REST Service using Asp Net Core
- ✓ Implemented Code First Entity Framework
- ✓ Conducted maintenance and Bug Fixing
- ✓ Coordinate and direct communicate with PM and Client

Technology: Microsoft .NET (C#), HTML5, CSS3, AngularJs, MS SQL Server 2012, .Net, jQuery, JSON, MVC(Model-View-Controller), Web API, Kendo UI, SharePoint Client Api

PROFESSIONAL EXPERIENCE

➤ **Health Industry** – *Frontend/ Backend Developer*

March 2014 – March 2015

- ✓ Conducted maintenance and Bug Fixing
- ✓ Coordinate and direct communicate with PM and Client

Technology: Microsoft .NET (C#), DHTMLX, MS SQL Server 2012, .Net, Windows Form

➤ **Business Industry** – *Mobile Application / Backend Developer*

January 2014 – March 2014

- ✓ Implemented Data Layered Software Architecture
- ✓ Implemented HTML5 and PhoneGap as Front end
- ✓ Implemented REST Service using Asp Net Core
- ✓ Implemented Code First Entity Framework
- ✓ Conducted maintenance and Bug Fixing
- ✓ Coordinate and direct communicate with PM and Client/Business owner

Technology: Microsoft .NET (C#), HTML5, Bootstrap, Team Foundation Server, MS SQL Server 2012, .Net, jQuery, JSON, Cordova PhoneGap

➤ **Health Industry** – *Frontend/ Backend Developer*

October 2013 – December 2013

- ✓ Consume and Implement data management within application
- ✓ Conducted maintenance and Bug Fixing
- ✓ Coordinate and direct communicate with PM and Client

Technology: Microsoft .NET (C#), MS SQL Server 2012, Window Form, Console, Web API

PROFESSIONAL EXPERIENCE

➤ **Work Platform for Business Management** – *Frontend/Backend* March 2012 – October 2013

- ✓ Implemented Asp .Net Web
- ✓ Implement on HTML with bootstrap and css design
- ✓ Implemented Code First Entity Framework
- ✓ Conducted maintenance and Bug Fixing
- ✓ Research and Implement 3rd party Api
- ✓ Integrate and develop application into native language of iOS 6.0
- ✓ Actively participate on sprint planning, retrospective
- ✓ Coordinate and direct communicate with PM, Team Lead, Tester and Client

Technology: NET (C#), HTML, CSS, Team Foundation Server, MS SQL Server 2008, .Net, jQuery, JSON, ASP Net, Web API. Integration of Different 3rd party apis such as linkedin, constantcontact, google drive, google calendar, live calendar, live contact, iOS6.

PROFESSIONAL EXPERIENCE

- **Airline Industry – Mobile Application Developer** January 2025 – March 2026
- ✓ Hired as an iOS mobile developer consultant to implement new features and application upgrade
 - ✓ Implement Authentication module across mobile application
 - ✓ Collaborate with leads, developer, tester within the firm and utilizing Agile process
 - ✓ Implement Dual branding design across mobile application

Technology: Xcode, Objective-C, Swift, SwiftUI, Firebase, Optimizely, GitHub

- **Financial Industry – DevOps/Backend Developer** January 2023 – December 2024
- ✓ Hired as consultant to fix vulnerabilities and prisma findings, function app version upgrade, framework upgrade, apim migration for microservices
 - ✓ Collaborate with leads, developer, tester within the firm and utilizing Agile process
 - ✓ Works as backend and devOps developer for project deployment

Technology: Microsoft Azure, Azure DevOps, CI/CD, yml pipelines, Azure functions, Api Management, Keyvault, Service bus, Storage Account, .net core, Api, Terraform, Postman

- **Financial Industry – Mobile Application Developer** February 2021 – July 2022
- ✓ Hired as consultant to fix vulnerabilities to add new features and suppress vulnerability of mobile application
 - ✓ Collaborate with leads, developer, tester within the firm and utilizing Agile process
 - ✓ Works as iOS mobile developer

Technology: Xcode, Objective – C, Swift, VersionOne, AWS
